

PREVENTIVE MAINTENANCE SOFTWARE

HAGERMAN & COMPANY*

MAINTENANCE CONNECTION®

MAKE BETTER DECISIONS WITH THE RIGHT INFORMATION AT THE RIGHT TIME

- Record and access critical PM data across multiple locations. All PM information resides in one place and can be associated with multiple assets throughout Maintenance Connection.
- Monitor unlimited amounts of manufacturer related specifications and metrics to make better decisions about how and when PMs are performed. Moreover, procedures can be associated to these work orders, providing valuable task instructions, estimated materials and critical documentation.
- Keep your team and operations aligned by providing a single source of PM information for all stakeholders across the maintenance organization.

IMPROVE UTILIZATION OF YOUR NUMBER ONE ASSET: YOUR STAFF

- Stay abreast of PM work and the status of team assignments. Balance workloads when scheduling preventive maintenance using Maintenance Connection's PM Balancer.
- Save man hours and improve prioritization of work through sophisticated monitoring of equipment and assets, such as basing PMs off cycle counts.
- Never fall behind. Avoid missing deadlines--especially for regulatory compliance--with system-generated email notifications when a new PM is coming due.

PREVENTIVE MAINTENANCE

Preventive Maintenance (PM) equips you with valuable insights to save time and money. Easily create schedules, track procedures, set maintenance routines, balance workloads, and more with auto-generated schedules and PM notifications.

SAVE TIME AND REDUCE REPETITION WITH ADVANCED PM CAPABILITIES

- Easily plan for work to be performed through automation. For example, PM schedules can trigger auto-generated work orders. And, planners have access to a range of automatic assignments, procedures and dispatching options.
- Create PM schedules at varying frequencies. Maintenance Connection provides a wide variety of options for scheduled maintenance, including seasonal and temporary scheduling. Moreover, you can set PM frequency based on parameters such as meter readings or hours.
- Automate PMs based on equipment use. And, specify alternate timing for different procedures on the same PM. With advanced features and flexibility, Maintenance Connection supports and adapt to your unique requirements.

"Having come from two other CMMS system MC is hands down the best, from PMs all the way down to inventory and especially tech support."
